

BOINC / DRUPAL

WORKSHOP 9

WHAT IS DRUPAL?

A GOOD THING

- x Content management system
- x Web development framework
- x Driven/maintained by community
- x Distributed under GPL

WHY USE DRUPAL?

FOR A WEB AT PEACE, JUST ASK DRIES

- x Full CSS support for theming
- x Change management made easy
- x Scriptable deployment
- x Extensible by design
- x Distributed maintenance

DRUPAL HAS ...STYLE.

I HAVE STYLE

- x Themes and their sub-themes
- x Style anything with CSS
- x Switch themes with a click

...CHANGE YOU CAN "GIT."

WHILE THE GIT'N IS GOOD

- x Export config to code
- x Organization with "Features":
 - {+} module dependencies
 - {+} layout extensions
 - {+} roles & permissions

...SERIOUS DEPLOYMENT.

FOR SERIOUS DEPLOYMENTERS

- x Dev >> beta >> production
- x Auto dependency resolution
- x Scripted schema updates
- x Heck, script everything

...EXTENSIONS.

NOT FOR HAIR, BUT FOR CODE

- x Modular to the core
- x Pick & choose features
- x Customize:
 - {+} build your own modules
 - {+} hook into existing functions

...COMMUNITY POWER.

POWER TO THE PEOPLE

- x Distributed module ownership
- x Distributed maintenance load
- x Update via UI or scripts
- x Active support community
